

LISTEQ launches HostedVirtualBox

HostedVirtualBox

Millions of VirtualBox users can now enjoy a fully hosted Cloud Desktop Experience

Rotterdam, The Netherlands - June 25, 2013 - LISTEQ, the global leader in Cloud Desktop technology and BYOD-Clients, announced the release of HostedVirtualBox, providing a Cloud Desktop for VirtualBox users with numerous BYOD-Clients.

HostedVirtualBox is based on the proprietary BoXedVDI software developed by LISTEQ. BoXedVDI combines a Plug & Play experience, based on VDI technology, to create Cloud Desktops combined with BYOD-Clients for all possible operating systems and devices, e.g. Windows, Android, iOS, Ubuntu, HTML5. The combined product provides existing and new VirtualBox users the option to easily extend their capabilities of working on Virtual Machines. HostedVirtualBox can be ordered per today from www.hostedvirtualbox.com.

“VirtualBox has tens of millions of users worldwide and we are excited that we can provide them with a Cloud hosted version of VirtualBox with numerous BYOD-Clients.” said Simon Overgaag, CEO of LISTEQ.

About LISTEQ

LISTEQ developed BoXedVDI, the ultimate Cloud Desktop solution with numerous BYOD-Clients. Users can host Desktops in the Cloud and access those with numerous BYOD-Clients, e.g. Windows, Android, iOS, Linux Ubuntu, HTML5. It is flexible as it works on all OS and hardware. It is a software only, "Plug & Play" product, simple to deploy and manage and very cost effective.
